Research on the use of Far Infrared Saunas to treat Lyme Disease.

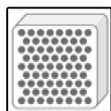

Many people benefit from the use of the far infrared sauna, but in particular, those who suffer with Lyme Disease. These patients often suffer with muscle and joint pains, cold body temperature, being susceptible to co-infections due to poor immune function, and toxic burdens since their liver and kidney function may be more compromised. When incorporating the use of a far-infrared sauna, people who suffer from Lyme Disease can improve their body's ability to function, remove toxic chemicals, and support their immune system. It is an excellent adjunctive treatment among other treatments for those with Lyme Disease.

Far Infrared Ray is one of the Most Effective & Easiest Ways To Detoxify The Body From Chemicals, Toxins & Poisons of All Kinds!

The Relax Sauna is one of the most progressive far infrared saunas. The Relax Sauna uses medical grade technology, the energy emitted from the Relax Sauna generators are **95% - 99% FIR** (most people have no clue that almost all infrared saunas are only 25 - 60% Far Infrared Energy.) No wooden FIR sauna can compare to the effectiveness of the Relax Sauna.
