

# Massage Therapists Love The Relax Sauna!

What makes the Relax Sauna so special is that it MASSAGES every Cell of Your Body or Your Client's Body, It warms the fascia, and allows you to do Greater work in much less time. A boon to any massage therapist who want to extend the life of their hands."

We have been promoting the Relax Saunas at expos and conferences for the last 13 years. Over this span of time, we have accumulated about 400 video testimonies from people at the expos. About 1/2 are instant reports of the relief from inflammation and pain, as well as how great & invigorated they felt in just 5-10 minutes in the Relax Sauna. The other testimonies were from those who came back 1-8 years later wanting to tell us how much they love the Relax Sauna, and to tell us what it has done for them over the years. Some are pretty impressive.

## Maylene says It felt as good as getting a massage, if not Better

As soon as I felt the heat in that relax sauna, my muscles felt like they were melting it was so .. I don't . It almost felt ... it felt as good as getting a massage if not better. .. I get massages every other week. my friend that was just sitting in it, we trade and she was mouthing to me that you have to get in this thing . It is amazing. I am really thinking of purchasing one for my customers and my spa. They probably wouldn't even want a massage once they got out of this thing that's worth it. The muscles just instantly relax. It was even, the heat it felt the heat was very even underneath the bottom the top the warmth was just evenly dispersed. Every area even where I was sitting, I felt the same amount of heat. It wasn't uncomfortable . it was just . I don't know I have never felt anything like it. It was great. Genius ! I am so glad you were at this massage festival. And I hope that everyone experiences that, because that was wonderful. Wonderful, Yes !

Mark Says:

## Putting Clients in the Relax Sauna before getting a massage has brought more business !

It's fantastic. The Relax Sauna really helps with my work. Clients love it because they can relax. They don't experience as much pain when they go through a session. My mother specifically has low back pain, rheumatoid arthritis, & osteo arthritis. She has been using it for a full year. She just came back from having tests at her doctor. Her rheumatoid readings are completely gone. She no longer has rheumatoid arthritis. My mother in law has had double knee replacements. She doesn't have issues now with mobility and range of motion. My clients love them. They use them multiple times a day in their homes. Those who have purchased them (from me) send me more people. It has also brought more business to the spa. We have it as an add-on to some of our services. It gives the client a chance to relax before they get their massage. It's actually income for the business. We are adding that on, and they love it. So it's fantastic.

Personally, I've had skin issue that it helps. It has helped heal them. It's helped me with energy, & recovering. I am active. When I ride my bike, I've noticed that It's easier. I don't get as winded when I am on my bike. It really has been a fantastic machine. I love it. Main thing I've noticed - is just more energy, less fatigue while I am going, and I don't have that post-workout soreness like I used to have. I am Relaxed - calms every thing down, I come out of a session & I feel great, Rejuvenated. And I just love it. When I am at the spa, I use it between every client for 5 to 7 minutes. It keeps my energy level up. I don't have so much fatigue at the end of the day. When I take it home, sometimes I'll use it twice during the day, right before bed & when I wake up. It really just helps my day go by. Oh Yeah, yeah, 10 minutes you're sweating and 20 minutes you're drenched, and if you can make it to 30 you just feel completely refreshed.
