Relax Energy - Technological Breakthrough!

Let us restore radiant health in your life today!

Come to Booth #10 and experience the benefits of Relax Energy’s pure far infrared light for healing. At 95% pure far infrared light, the Relax Energy’s Far Infrared generators deliver the highest level of far infrared light for purifying the body and cleansing the mind. If you research other infrared light emitters, you will find they are not as effective, only generating between 36-62% far infrared light.

Relax Energy is more “natural” than other infrared: Emitting the right frequencies that resonate with the cells of your body, increasing core temperature, creating more Free Oxygen, mobilizing the lymph, and thus detoxifying cells and increasing assimilation of nutrients.

The superior design of The Relax Energy technology starts with its precisely designed Semi-Conductor Chip. This design has won international awards for its innovation and ability (bypassing Planck’s radiation law) to produce over 95% pure far infrared light, thus, generating therapeutic chi energy, (which is thought to be impossible.)

There is something very different and more uplifting about the Relax Energy than any other Infrared emitters.
